KNIGHT EDMONDS

## INDUSTRY

REAL ESTATE

## HEADQUARTER

KENT

## SERVICE WE PROVIDED

WINDOWS 365

## KEY BENEFITS

- FLEXIBILITY
- EASE OF ACCESS TO ALL RESOURCES
- INCREASE PRODUCTIVITY

## OVERVIEW

Knight Edmonds, launched in March 2020, have a vision to offer a better experience to customers looking to move home. Their mission is to make moving simple and forging deep, long-lasting relationships with their clients.

To achieve this, they also needed to become more flexible and increase their productivity.

## WHAT DID WE DO?

Microsoft has a long experience developing cloud services. Windows 365 integrates seamlessly with the rest of the 365 suite. It brings a raft of benefits for businesses who need to be able to access documents from anywhere. Windows 365 securely streams from the cloud to any device and provides customers with a virtualised computing experience where they can stream their personalised Windows desktop, apps, settings, and content from the Microsoft cloud to any device.

Being a Microsoft Partner, we advised the Knight Edmonds team how to gain the maximum benefits from this product and setup Windows 365.

# KNIGHT EDMONDS

*"We approached Genmar as we needed a flexible IT solution that allowed us to operate remotely seamlessly or desk hop moving around the office, sometimes multiple times a day. James recommended Windows 365, not only did this solve the problem it also brought with it a whole host of additional benefits, saving us huge amounts on upgrading high spec hardware and allowing us to switch to mini HDMI stick PCs, saving huge amounts of space and minimising the usual tangle of cables around the office."*

*Alex Knight -  
Director*

## WHY DID WE DO IT?

Knight Edmonds likes to give their staff the flexibility to work from anywhere using any device. With their existing setup, the team experienced slow start ups, missing files and settings changing, which led to frustration and losing valuable time.

Setting up Windows 365 allowed all staff to access their full desktop software and data from anywhere and any device, including mobile phones and tablets.

## RESULTS

Each employee now have their personal PC in the cloud, meaning all their settings and documents are ready to go should they need to switch to a different device, for example from a computer in the office.

With this set up we helped the team at Knight Edmonds to overcome the mentioned issues and become more flexible and efficient.
